

SET UP ROUTER

This guide makes setting up your new Internet connection a breeze!

EQUIPMENT CHECK

First things first, make sure you have these items handy

1

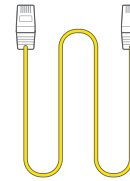

1x NetComm Router

2

1x Power adaptor

3

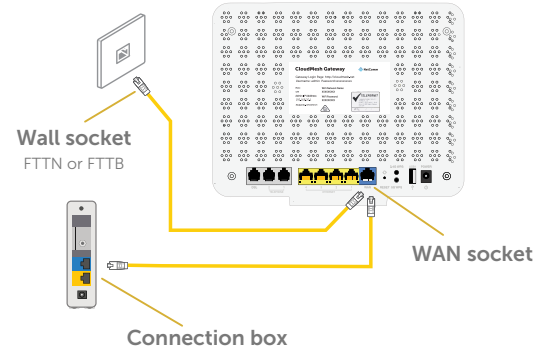

1x Ethernet cable (yellow)

STEP 1 DOWNLOAD THE APP

Plug in yellow ethernet cord into the blue WAN socket.

If your type of connection is FTTN (Fibre To The Node) or FTTB (Fibre To The Building) connect the other end of cable to the wall socket.

For all other connection types plug it into the connection box.

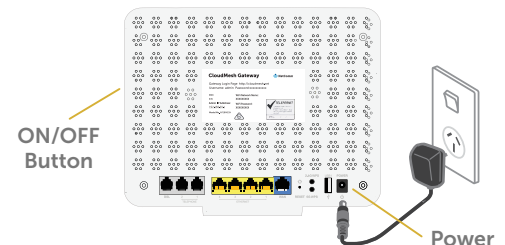

STEP 2 CONNECT TO POWER

Connect the power adaptor to power socket on the back of the router and the adaptor to an available power point.

Turn on the router using the on/off button located on the side. The router will automatically go through its configuration process.

Please allow up to 15 minutes for this to occur.

STEP 3 CONNECT YOUR DEVICES TO WIFI

Your wireless network name and WLAN key is located on the back of the router. On your computer, you will need to scan for the WiFi network being generated by your router. Once you have found the right network, enter the WLAN key on the back of the router.

IF YOU NEED ASSISTANCE AT ANY STAGE, PLEASE CALL US ON **1300 847 201**

If you wish to change any advanced settings on your router, please use the details below:

Address: 192.168.20.1 **Username:** admin **Password:** See back of router for unique password
