

SET UP ROUTER

This guide makes setting up your new Internet connection a breeze!

EQUIPMENT CHECK

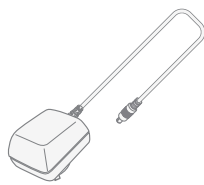

First things first, make sure you have these items handy

1

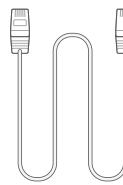

**Nokia WiFi
Beacon 2**

2

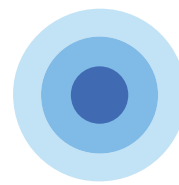

Power adaptor

3

Ethernet cable

4

NOKIA WIFI App

Download on the
App Store

GET IT ON
Google Play

STEP 1 | DOWNLOAD THE APP

Download the NOKIA WiFi app, available for free in the App Store and Google Play.

Open the app and scan the QR code on the bottom of the beacon.

Create an account with the mobile app. This will enable you to setup, manage and customise your network with the mobile app.

STEP 2 | CONNECT AND TURN ON

Firstly ensure there is an ethernet cord connected to your network connection box. Next, plug the beacon into the power outlet located close to the ethernet cord, then turn on the beacon. Connect the ethernet cord into the blue WAN socket.

STEP 3 | PLACE THE OTHER BEACONS (if applicable)

If you have more than one beacon, just connect them to the power outlets and place them around your home no further than 2 rooms apart.

STEP 4 | CONNECT TO WIFI

Connect your devices using SSID and WiFi key shown at the bottom of your beacon which is plugged into the connection box.

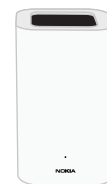

If light at the front turns red, it is either too far away from other beacons or there is an interference like a fridge.
